Where We Are We are located in Arkansas — in the northwest corner county (Benton), only twelve miles south of the Missouri line and twenty-six miles east of the Oklahoma line; eighty-one miles almost due north of Fort Smith, Arkansas, and eighty-three miles, almost due south of Joplin, Missouri; one hundred twenty-nine miles east of Tulsa, Oklahoma, and one hundred six miles southwest of Springfield, Missouri. On Federal highways 71 and 62, just south of Rogers, Arkansas.

ON THE TIP TOP OF THE OZARK MOUNTAINS where our growing season is almost thirty days shorter than at Fort Smith, Arkansas. Our summers are short and nights are cool, and our growing season more like that of North Missouri, Iowa and Nebraska, than Eastern and Southern Arkansas.

Hence, our stock is well adapted to the extreme Northern, Eastern and Western States as well as being the best for Southern States.

PRUNING READY FOR PLANTING

For 5% of the amount you pay us for your trees, shrubs, plants and grape vines, we will prune the roots and tops ready for planting according to best horticultural authorities on pruning and planting.

—WHY DO EXPERIMENT STATIONS, AGRICULTURAL COLLEGES AND FRUIT GROWERS RECOMMEND FALL BUYING? Because you can buy this Fall and have the stock shipped to you and "heel it in" so that you may plant at the most favorable time during Fall, Winter, or next Spring.

Fall planting is becoming more popular each season as experience shows its advantage. As soon as a tree or shrub becomes dormant it can be removed and change of location will affect it but little. When set out in the Fall the bruised roots begin at once to heal and callus is formed; recover quickly from moving; soon become firmly established and with the first touch of Spring are ready to go into business for themselves in a vigorous way.

Again, the ground is usually in better condition for planting in the Fall than in Spring, for much Spring planting is done when the ground is too wet for best results. Perhaps your Spring will be two or three weeks earlier. In this case your trees should be planted earlier than the dates you have ordered them shipped. If they have been planted in the Fall, these Spring delays are done away with.

Gentlemen:

Let me congratulate you on handling of my small original order to you.

First of all I was pleased to receive your postal acknowledgment of my order, etc., next, your prompt shipment as requested, and then the arrival of the stock, which was high grade, well packed, variety labeled and in splendid shape after its long journey.

Just to show my appreciation, please send me the following additional order.—Frank Wilbert.

Iola, Wisconsin,
April 14, 1949.

Our little trial order for trees and grape vines came yesterday in perfect shape and we set them out at once. The 5 fruit trees and 16 grape vines are the finest nursery stock we have ever seen. We are proud of them and will give them the best of care. The roots and moss were still wet when set out. You will hear from us next year. Many thanks.—Wm. J. and Chas. E. Boerner.

Riverdale, Ga.

Dear Sir:

I want to let you know in my own handwriting that I never was so pleased with my fruit trees and grape vines, and when I am able to order again, you can expect getting mine as yours are the very best at a big savings to anyone that buy from you. I want to thank you in advance for my order and I say again I sure am pleased with my order.—W. H. Craig.

Lincoln Center, Maine,
April 18, 1949.

The trees we ordered from you last year all lived and we were very pleased with them. They grew a lot last year and all lived through the winter.—Fred Tupper.

Dallas, Tex.

Gentlemen:

The 16 peach trees recently ordered were delivered at my home prepaid in perfect condition; the roots still moist from scientific packing. They were beautiful trees, and I was well pleased with them. It affords me pleasure to thank you for the prompt and efficient handling of this order.—Guy M. Orr.

JUJUBE (Hardy Chinese Date)

The Chinese Date (Jujube or Zizyphus) is a fruit from the high interior of China. The tree is a heavy and constant bearer and commences to bear at an early age, four-year-old trees having produced 150 pounds of fruit. It blooms very late in the spring, avoiding all danger from spring frosts. The fruit is one to two inches long, and chocolate colored. It is delicious when eaten fresh or cured like dates, and is excellent for preserves and jam. Cooked in a sugar syrup and allowed to dry, it becomes a most tasty and palatable confection which we believe will eventually rival the date as a commercial product. Every home should have one or more trees. It likes a clean backyard where it is not cultivated but will grow anywhere.

BIG JUICY STRAWBERRIES

Important Notice!! A new disease of strawberry plants (Red Stele Root Rot) is very destructive and reports of damage vary from 40 to 92 per cent reduction in fruit crop. No treatment of the disease is known and the fungus will live in the soil for several years making it unprofitable to produce strawberries on the same land where the fungus has been in the soil. This disease is spreading rapidly. DON'T TAKE ANY CHANCE OF GETTING INFESTED PLANTS. ORDER FROM US. Our plants are twice inspected, once in the Spring for Red Stele disease and once in the Fall for all kinds of insects and diseases that attack strawberry plants. Our plants are found to be apparently free of all diseases. ORDER OUR PLANTS FOR HEALTHY STURDY PLANTS. DON'T GAMBLE ON CHEAP PLANTS AND LOSE YOUR FRUIT CROP.

'YOUNGBERRY

The new Youngberry has achieved the greatest success ever scored by any of the berry family. It not only bears very heavily but the fruit is easy to handle; it is very attractive, ships well, keeps well and cans well. It has so many commercial possibilities and it fits in so well in the home garden that everybody should be interested in having a few vines or a commercial planting.

Youngberries are among the largest berries, of dark wine color, have a minimum of seed, highly flavored and yield a rich looking cherry colored juice. You will find that more fruit will be produced from a few Youngberry bushes than any others on the same amount of ground. Youngberries thrive where any other berry fruits grow but do best in states of the same latitude as Ohio and South.

The huge blooms of velvety texture measure 6 to 8 inches across. The leaves are long, narrow and gracefully formed, and the plants remain decorative even after the blooming period is over. It is no wonder that the Kaempfer is called the "Orchid of the Garden." Excellent for cutting it will grow 3 to 4 feet high. Arkansas Stone Fruit Nursery Stock is VIRUS-FREE

Our stone fruits are grown under the vigilant eyes of the inspectors of the Arkansas State Plant Board in a region free from virus diseases, making it by far the safest and best nursery stock for you to buy.

Virus diseases such as "Peach Yellows," "Phony Disease," "Peach Mosaic," and "Little Peach Disease" have ruined thousands of valuable peach orchards and practically wiped out the peach industry in certain peach-growing areas. These diseases are established in orchards by means of a few diseased trees in shipments of nursery stock and when planted these diseases spread from tree to tree by insects. The only control meas-

ures so far available are the destruction of the trees and planting of new trees grown in regions free of these diseases.

Don't take any chances by ordering trees that might be infested with these diseases. ALL OF OUR STONE FRUIT NURSERY STOCK IS GUARANTEED COMPLETELY FREE FROM VIRUS DISEASES AND IS THEREFORE THE BEST AVAILABLE FOR PLANTING IN ANY OF THE FRUIT-GROWING AREAS IN THE UNITED STATES. BE SAFE AND ORDER STOCK GUARANTEED VIRUS-FREE. DON'T RISK THE LOSS OF YOUR ENTIRE ORCHARD.
